

## Brainstorming & Idea Prioritization Template

|                      |                                        |
|----------------------|----------------------------------------|
| <b>Date</b>          | 27 June 2026                           |
| <b>Team ID</b>       |                                        |
| <b>Project Name</b>  | <b>Credit Card Approval Prediction</b> |
| <b>Maximum Marks</b> | 3 Marks                                |

### Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

| S.No | Team Member   | Idea / Suggestion                                                                                                           | Category                        | Group No. |
|------|---------------|-----------------------------------------------------------------------------------------------------------------------------|---------------------------------|-----------|
| 1    | M. Anandkumar | Develop an ML model to predict whether a credit card application will be approved or rejected.                              | Machine Learning                | 1         |
| 2    | M. Anandkumar | Build a user- friendly Flask Web application for entering applicant details and displaying predication results.             | Web Development                 | 1         |
| 3    | M. AnandKumar | Perform data preprocessing, feature engineering,model tranning, evaluation , and deploy the application on IBM Cloud/GitHub | Data Science & Cloud Deployment | 1         |

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

| Group No. | Final Idea               | Feasibility (High/Medium/Low) | Importance (High/Medium/Low) | Priority | Selected (Yes/No) |
|-----------|--------------------------|-------------------------------|------------------------------|----------|-------------------|
| 1         | ML Model for Credit Card | High                          | High                         | High     | Yes               |

|   |                                                   |        |      |        |     |
|---|---------------------------------------------------|--------|------|--------|-----|
|   | Approval<br>Prediction                            |        |      |        |     |
| 2 | Flask Web<br>Application for<br>Predication       | High   | High | Medium | Yes |
| 3 | IBM Cloud<br>Deployment<br>with User<br>Interface | Medium | High | Low    | NO  |
