

Scalability & Future Plan

Date	1 June 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited to a single machine deployment	Cannot support many users simultaneously	High
2	Uses a static training dataset	Prediction accuracy may decrease over time	Medium
3	Basic authentication and security	Less secure for production use	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy on cloud with load balancing to handle more users.
2	Data Storage	Local CSV file	Migrate to a cloud database such as MySQL or PostgreSQL.
3	Performance	Runs on a single server	Optimize the model and use scalable cloud infrastructure.
4	Security	Basic input validation	Add user authentication, HTTPS, and secure data encryption.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Improve model accuracy using advanced ML algorithms	3 days	More accurate approval predictions

Phase 2	Deploy the application on IBM Cloud	6 days	Better accessibility and scalability
Phase 3	Integrate a secure database for storing applications	5 days	Improved data management and security
Phase 4	Develop a mobile-friendly interface and dashboard	3 days	Enhanced user experience and accessibility
